## **Bishnupur Public Private I.T.I. An Overview**

Bishnupur Public Private Industrial Training Institute, established in 2015, is a unique endeavour of Bishnupur Public Education Society. It is affiliated to N.C.V.T., New Delhi & accredited by Quality Council Of India. Few young entrepreneurs of Bishnupur founded a trust with a dream to set-up an Education Hub at Bishnupur. The whole endeavour is being headed by Mr. Satya Sadhan Dutta, a man of distinguished personality, innovative ideas and indomitable courage.

The Institute nestled in the lap of nature, provides an enriching atmosphere where students are encouraged to develop their physical, intellectual and technical faculty. It is situated in well-lit, airy, spacious edifices on lush-green beautifully landscaped campus at out-skirts of temple town Bishnupur. It has hygienic, pollution-free, calm and quiet environment. The serene ambience of the campus is thrilled with the songs of birds, whispering wind and fascinating floral fragrance. Its sister concern Bishnupur Public Institute Of Engineering (Polytechnic College) is situated side by side. It is at Siromonipur, only 5km away from Bishnupur Railway Station and 3km from Bishnupur Bus Stand.

### **Courses Offered / Taught:**

<b>Sl.No.</b>	<b>Name of Trade</b>	<b>Duration</b>	<b>Intake</b>
1.	Electrician	2 Years	40
2.	Fitter	2 Years	40
3.	Welder	1 Year	40
4.	Surveyor	2 Years	48

Our objective is to provide a comprehensive education that aims at intellectual, moral, physical, and emotional development of the students under our care. All sorts of assistance are rendered here for technical development of the students making them skilled persons. This ITI has state-of-the art laboratories, workshops and well stocked library. Theoretical knowledge when backed up by practical experiments can help students to understand the basic premises faster and more easily.

Bishnupur Public ITI's Vision is to create high quality centre of learning, which will perpetuate the culture of India and its holistic values and to prepare dynamic and caring citizens who will meet the challenges of a global society while retaining their traditional values. Bishnupur Public ITI's Mission is to stress on the development of body, mind, intellect and spirit of the children. Bishnupur Public ITI wishes to impart core values- (a) Excellence (b) Innovation (c) Ethics (d) Commitment.

# CONGRATULATIONS FOR ACHIEVEMENT

“Life being a journey, Success has brought you many miles ahead of many/people. Congratulations.”

Class	: - 10 A.M. – 01.00 P.M.	Recess	: - 01.00 P.M. – 1:30 P.M.
Class	: - 1:30 P.M. 5:30 P.M.	Dinner	: - 8:30 P.M. – 9:30 P.M.

## ANTI RAGGING MEASURES

All DGE&T and N.C.V.T approved Institutions are under compulsion to follow the regulations framed for curbing the menace of Ragging. To eradicate the evil of Ragging the Supreme Court of India has asked all students and their parent, guardian to submit the specified affidavits at the time of admission. Ragging is a criminal offence and as per the directives of the Supreme Court, the college authority shall expel a student and inform the matter to the police, if he/she is found responsible for the ragging.

In B.P.I.T.I., there is no event of Ragging till date. We have taken steps to check the evil of ragging through-

1. Anti-Ragging Committee.
2. Anti-Ragging Squad.
3. Anti-Ragging Mentoring.
4. Anti-Ragging Monitoring.

The Anti -Ragging Committee and the Anti-Ragging Squad have been formed. In case of necessity, the students will contact the members of the Committee and the Squad. The names of the members of the Committee and the Squad are given below:

### ANTI-RAGGING COMMITTEE

## TRAINING & PLACEMENT CELL AT B.P.I.T.I.

A Training and Placement Cell has been formed under the close supervision and active co-operation of all Faculty members. In this Institute Students are being taught & trained to meet the challenge of working situation. Apart from teaching the subjects & practical hand-on training, the personality development & 360 degree HR development are focused. The placement cells with the placement persons are always attentive to organize seminars, debates, group discussions, mock interview for the students with the help of prominent industrial personalities. Industrial visits & interaction with various corporate & Govt. Sectors increase the exposure of our students & faculties, which help our students for final placement in reputed industries and organizations.

Stream wise Merit List of students will be prepared in the final year of the ITI Course for Campus Recruitment. The Merit Lists are prepared on the basis of marks obtained in the Madhyamik Pariksha, +Semester Examination (up to 4th Semester) +Attendance in classes. The students who will have 75% attendance in the 1<sup>st</sup> year and 2<sup>nd</sup> year classes will get first preference.

Name of students will be sent to different companies serially from the top of the Merit Lists as per requirement of the Companies. Once the name of a student is sent to any company, his or her name will not be sent to the other company until one round of the Merit List is complete.

If a particular company fixes special norms/criteria, in that case names of students will be considered further for sending the names of the students occurring in the Merit List, who will fulfil the said norms and criteria laid down by that Company.

## COURSE INFORMATION

### **TRADE – FITTER**

**CRAFTSMEN TRAINING SCHEME (CTS)**

**NSQF LEVEL- 5**

During the 02 years duration a candidate is trained on subjects Professional Skill, Professional Knowledge, Engineering Drawing, Workshop Science & Calculation and Employability Skills. In addition to this a candidate is entrusted to make/do project work and Extra Curricular Activities to build up confidence. The practical skills are imparted in simple to complex manner & simultaneously theory subject is taught in the same fashion to apply cognitive knowledge while executing task. The practical part starts with basic fitting with tolerance level  $\pm 0.5\text{mm}$  and finally to  $\pm 0.02\text{mm}$  and angular tolerance from  $1^\circ$  to  $10'$  at the end of the course. The broad components covered under Professional Skill subject are as below:

**FIRST YEAR:** The practical part starts with basic fitting in the beginning and the candidate also imparted training on allied trades viz., Sheet Metal, Welding (Gas & Arc) which leads to multiskilling. In the basic fitting the skills imparted are sawing, filing, marking, chipping, measurement, riveting, soldering, brazing, drilling and observation of all safety aspects is mandatory. The accuracy achieved is of  $\pm 0.25$  mm. The safety aspects cover components like OSH & E, PPE, Fire extinguisher, First Aid and in addition 5S being taught.

Different drilling operations (through, blind, angular), reaming, offhand grinding, tapping, dieing, different fits viz., sliding fit, etc., scraping, fastening (nuts & bolts, riveting, studs, screws, etc.). The accuracy achieved is of  $\pm 0.04$  mm and angular accuracy to 30minutes. Different turning operations on lathe (step, grooving, chamfering, drilling, boring, knurling & threading), simple repair, overhauling and lubrication work on machine are being taught in the practical.

**SECOND YEAR:** Power tool operation, different complex assembling and fitting, fastening, lapping, making gauges, pipe works and pipe joints, Dismantling, overhauling & assembling valves are covered. The accuracy achieved is of an accuracy of  $\pm 0.02$  mm & 10 minutes.

Making & using drill jigs, making of critical components, repair & maintenance of power transmission system, making of template & complex gauges, identify different Pneumatic & hydraulic components and circuit construction, repair & maintenance of machinery like lathe, drill, grinding, bench drilling, Inspection of Machine tools, Accuracy testing of Machine tools and erection of simple machines are being performed as part of practical training.

Professional Knowledge subject is simultaneously taught in the same fashion to apply cognitive knowledge while executing task. In addition components like Physical properties of engineering materials, Interchangeability, Method of expressing tolerance as per BIS Fits,

different types of iron, properties and uses, special files, honing, Metallurgical and metal working processes such as Heat treatment, the various coatings used to protect metals, different bearing, working material with finished surface as aluminium, duralumin and

stainless steel, topics related to non-ferrous metals, Method of lubrication are also covered under theory part.

Total three projects need to be completed by the candidates in a group. In addition to above components the core skills components viz., Workshop calculation & science, Engineering drawing, employability skills are also covered. These core skills are essential skills which are necessary to perform the job in any given situation.

## **TRADE – ELECTRICIAN**

### **CRAFTSMEN TRAINING SCHEME (CTS)**

### **NSQF LEVEL- 5**

During the two years duration of Electrician trade a candidate is trained on professional skill, professional knowledge, Engineering Drawing, Workshop Calculation & Science and Employability skill. In addition to this a candidate is entrusted to undertake project work and extracurricular activities to build up confidence. The broad components covered related to the trade are categorized in four semesters each of six months duration. The semester wise course coverage is categorized as below:-

**FIRST YEAR:** In this year the trainee learns about safety and environment, use of fire extinguishers, artificial respiratory resuscitation to begin with. He gets the idea of trade tools & its standardization, identifies different types of conductors, cables & their skinning & joint making. Basic electrical laws like Kirchhoff's law, ohm's law, laws of resistances and their application in different combinations of electrical circuit are practiced along with laws of magnetism. The trainee practices on circuit for single phase and poly-phase circuits for 3 wire /4 wire balanced & unbalanced loads. Skilling practice on different types & combination of cells for operation and maintenance is being done. Wiring practice with installation of different accessories like ICDP switch, distribution fuse box and mounting energy meters are practiced as per IE rules for hostel/residential building, workshop and its fault detection are done by trainee. The trainee will practice for pipe & plate earthing. Different types of light fitting are to be done like HP/LP mercury vapour and sodium vapour are prominent. The trainee will practice on different types of measuring instruments like multimeter, wattmeter, energy meter, phase sequences meter, frequency meter, for measurement of electrical parameters in single & three phase circuits. He will gain skill on range extension, calibration and testing of meters. Practice for dismantling, assembling and testing of heating element equipment, induction heating equipment, grinding machines and washing machines will be done by trainee. Skill will be gained on transformer for operation, efficiency, series parallel operation, replacement of transformer oil and combination of single-phase transformers for 3 phase operation. The trainee will practice on winding of small transformer.

**SECOND YEAR:** In this year the trainee will study the details of electrical rotating machines viz. DC machines, induction motors, alternators & MG sets and practice on them. The trainee will practice on determining characteristics, their performance analysis, starting,

speed control and reversing direction of rotation of machines. He will practice on parallel operation & synchronization of alternators, winding practice and over hauling will be practiced for DC machine and induction motors. Practices on diodes for bridge rectifier, switching devices & amplifiers by electronic components, different wave shape generation and testing by CRO. Designing control cabinet, assembling control elements and their wiring are to be practiced. Speed control of AC/DC motors by electronic controller will be practiced. The trainee will practice on testing, analyzing and repairing of voltage stabilizer, emergency light, battery charger, UPS and inverter. He will gain knowledge of thermal, hydel, solar & wind energy systems. The trainee will practice on distribution system, domestic service line and accessories & their protection by practicing on relay and circuit breaker for operation and maintenance.

## **TRADE – SURVEYOR**

### **CRAFTSMEN TRAINING SCHEME (CTS)**

### **NSQF LEVEL- 5**

During the two-year duration a candidate is trained on subjects viz. Professional Skill, Professional Knowledge, Workshop Science & Calculation and Employability skills. In addition to this a candidate is entrusted to make/do project work and Extra Curricular Activities to build up confidence. The practical skills are imparted in simple to complex manner & simultaneously Professional Knowledge (theory subject) is taught in the same fashion to apply cognitive knowledge while executing task. The practical part starts with simple geometrical drawing and finally ends with preparing topographical map, Cadastral/ mouza map, detailed road project, survey drawing using CAD, application of GIS techniques, Hydrographic survey, Transmission line site survey, railway line site survey, sanction plan of Residential / Public building, and detailed estimate. The semester wise course coverage is categorized as below:-

**FIRST YEAR:** In the beginning of the course the trainees are acquainted with occupational safety & health, PPE, etc. Observation of all safety aspects is mandatory. The safety aspect covers components like OSH & E, PPE, Fire extinguisher, First Aid, etc. The practical part starts with basic drawing (consisting of lettering, numbering, geometrical figure, symbols & representations). Later the drawing skills imparted are drawing of different scales, projections, perform site survey and prepare a site plan using chain / tape, prismatic compass, perform AutoCAD drawing. Knowledge and application of Computer Aided Drawing has been introduced. Workspace creating drawing using toolbars, commands, and menus. Plotting drawing from CAD. Different site survey using Plane table( radiation, intersection, traversing, determination of height), Theodolite (measurement of angle, traversing, computation of area), Levelling instrument (different levelling – differential, reciprocal, etc.), tacheometer (determination of horizontal and vertical distance, constants, etc.), field book entry, plotting, mapping, calculation of area, preparing traverse drawing, simple building drawing using CAD are being taught in the practical.

**SECOND YEAR:** Making topographical map using Level instruments with contours ( Interpolation of contour, preparation of section, computation of volume, setting of simple, compound, reverse, transition and vertical curve), performing survey using Total Station and preparation of map (measurement of angle, co-ordinates and heights, downloading survey data and plotting), making of site plan by Cadastral survey (preparation of site plan,

calculation of plot area, etc.), performing road project survey (location survey and preparation of route map, profile/ longitudinal / cross sectional levelling and plotting) and survey drawing using CAD. Drawing of cartographic projection, setting and application of GIS & GPS techniques in various fields, collection and processing of data, performing hydrographic survey (determining hydrographic depth, measuring velocity of flow, determining cross sectional area of river, calculating the discharge of a river, etc.), performing transmission line site survey (making of alignment, conducting detailed survey, final location survey and making of tower foundation pit point), performing railway line site survey, drawing of building by CAD and preparation of estimation are being done as part of practical training. SECOND YEAR: Making topographical map using Level instruments with contours ( Interpolation of contour, preparation of section, computation of volume, setting of simple, compound, reverse, transition and vertical curve), performing survey using Total Station and preparation of map (measurement of angle, co-ordinates and heights, downloading survey data and plotting), making of site plan by Cadastral survey (preparation of site plan, calculation of plot area, etc.), performing road project survey (location survey and preparation of route map, profile/ longitudinal / cross sectional levelling and plotting) and survey drawing using CAD. Drawing of cartographic projection, setting and application of GIS & GPS techniques in various fields, collection and processing of data, performing hydrographic survey (determining hydrographic depth, measuring velocity of flow, determining cross sectional area of river, calculating the discharge of a river, etc.), performing transmission line site survey (making of alignment, conducting detailed survey, final location survey and making of tower foundation pit point), performing railway line site survey, drawing of building by CAD and preparation of estimation are being done as part of practical training.

## **TRADE – WELDER**

### **CRAFTSMEN TRAINING SCHEME (CTS)**

#### **NSQF LEVEL- 4**

During the one year's duration a candidate is trained on subjects Professional Skill, Professional Knowledge, Engineering Drawing, Workshop Science & Calculation and Employability Skills. In addition to this a candidate is entrusted to make/do project work and Extra-Curricular Activities to build up confidence. The broad components covered under Professional Skill & Professional Knowledge subjects are as below:

The practical skills are imparted in simple to complex manner & simultaneously theory subject is taught in the same fashion to apply cognitive knowledge while executing task. The safety aspects covers components like OSH&E, PPE, Fire extinguisher, First Aid and in addition 5S being taught. The practical part starts with edge preparation by Hacksawing, filing and fitting followed by Oxy Acetylene Welding & Brazing, Oxy Acetylene Cutting, Shielded Metal Arc Welding, Gas Metal Arc Welding, Gas Tungsten Arc Welding and Spot Welding, Plasma Cutting and Arc Gouging. These processes are widely used in Industries.

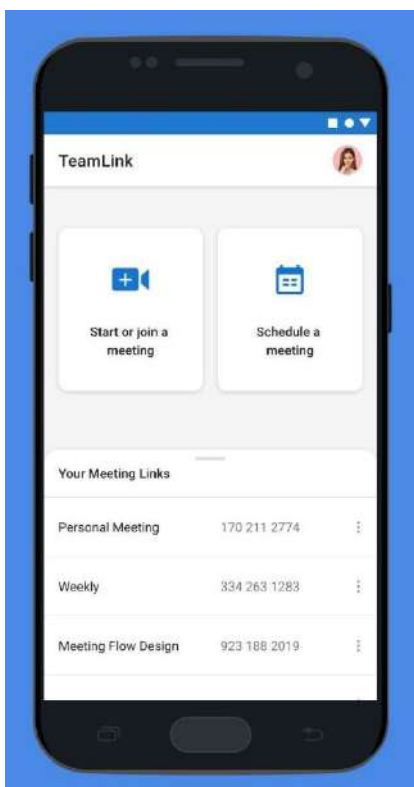

During the practice on Welding / Brazing process, the trainees will learn to read the job drawing, select the required base metal and filler metals, cut the metals by appropriate process, carry out edge preparation, setup the plant and do welding/Brazing on M.S, SS, Aluminium and Copper in different positions. On completion of each job the trainees will also evaluate their jobs by visual inspection, and identify the defects for further correction/improvement.

They learn to adapt precautionary measures such as preheating; maintaining inter-pass temperature and post weld heat treatment for Welding Alloy steel, Cast Iron etc. The Workshop Science taught will help them to understand the materials and properties, effect of alloying elements etc. Engineering Drawing taught will be applied while reading the job drawings and will be useful in understanding the location, type and size of weld to be carried out. The professional knowledge taught will be useful in understanding the principles of Welding, Brazing and Cutting process, use of jigs and Fixtures, distortion and methods of control, selection of consumables and to take precautionary measures for storage and handling and apply the same for executing the Cutting, Welding and Brazing. The knowledge and

Practice imparted on Destructive and Non-destructive testing will be used in understanding the standard quality of welds and to carry out shop floor Inspection and test in laboratories.

One project need to be completed by the candidates in a group. In addition to above components the core skills components viz., Workshop calculation & science, Engineering drawing, employability skills are also covered. These core skills are essential skills which are necessary to perform the job in any given situation.

## OUR ONLINE FACILITIES FOR TAKING CLASSES & VIRTUAL LAB

Classes are taken in Google meet, Zoom, Team Link. Recorded classes are uploaded our official YouTube channel.

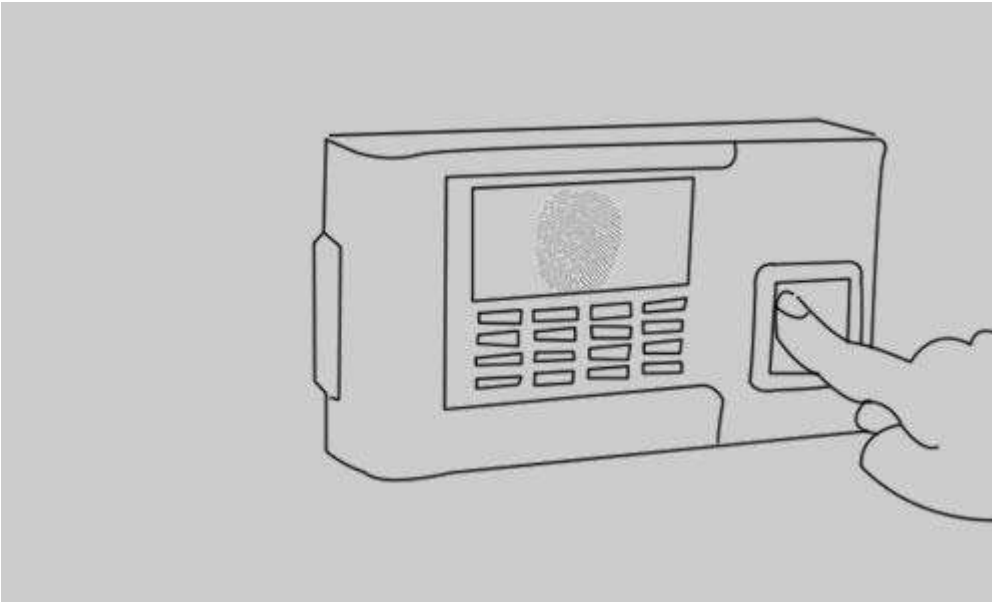

Assignment are taken every week in Google classroom.

Formative assessment are regularly taken on completion of each topic.

# ATTENDANCE SYSTEM FOR STUDENTS

## We have two Types of Attendance System

### 1. Offline System:-

### 2. Online system:-

Attendance is taken in Google Classroom, Google Form, our Website

[www.bishnupurpubliciti.org](http://www.bishnupurpubliciti.org)

# Surveyor (1st Year)

Days	10:00am-11.00am	11.00am-12.00pm	12.00pm-1.00pm	1.00pm-2.00pm	2.00pm-3.30pm	3.30pm-5.00pm
